Santa Cruz, CA 95064

Dear Ms. Gardner,

I am pleased to learn that there is an opening in the position of ITS/APM Assistant IV. With my skills in web applications and mobile applications, I am interested in contributing to the Applications and Projects your team is offering.

I have sufficient background knowledge to demonstrate some of the qualifications for the ITS/APM Assistant IV role. To exemplify, I have gained knowledge in HTML, CSS, JavaScript, and databases from the course "Web Applications". Here, I was able to demonstrate a project that my peers and I worked on for several weeks. This project, named "Rent-A-Cat," was started from scratch and was developed using Python and JavaScript as the front-end; while using MySQL for our database. Thus, by clearly demonstrating some of my web application skills, I feel I have obtained the valuable skills that the ITS/APM job position recommends.

Furthermore, another skill acquired while pursuing my degree was designing Android applications. In the mobile application class, I was to create an Android application. Working with my peers we developed an Android application that helps users write Haiku poems. We used Java and Retrofit to allow the users the functionalities needed for an easier time with the graphic user interface. By taking this course, it allowed me to develop my skills in programming in JavaScript, HTML, and Python.

As demonstrated, these strong exceptional skills allow me to work in a professional, multi tasked, and analytical environment. Furthermore, I hope to utilize these skills in order to make an impact on your ITS professional team's projects.

Thank you for reviewing my resume and I welcome the opportunity to discuss furthermore on this position your team is offering.

Sincerely,

Armando Silva
